

Avery Weigh-Tronix

WI-130 Multi-Scale

The fully programmable WI-130 Indicator is the natural choice for multi-scale applications. Its bright, vacuum fluorescent display supplies readings for up to four independent weight systems simultaneously. As a truck scale indicator, it can provide readouts of each platform and a system total.

With other multi-scale applications, you can ask the WI-130 to display single scale readings in one-inch high digits. Then program a soft key to switch the readout from one scale to the next.

WI-130 Alpha-numeric Key-boards

Speed data entry to the WI-130 Indicator with one of three optional alpha-numeric keyboards: the StanKey for normal settings, the TufKey 1 with spill resistant key membrane, and the TufKey 2 panel-mount version. One-year warranty applies.
