

PDOX Waste Management System

The PDOX Waste Management System for landfill, recycle and scrap operations is a computer based software data management system. It produces weight tickets, customer invoices and management reports from data collected during the weighing of inbound and outbound vehicles. The system includes PDOX software, an IBM or compatible computer system; a VGA color display; a 132-column dot matrix printer and cables for the printer and weight display.

General PDOX Software Features

- Completely menu driven, with easy to use "pop-up" reference screens
- Context sensitive help screens located throughout the system
- Handles alpha-numeric as well as numeric only data
- Multiple levels of password security limit general access to sensitive program modules
- Pop-up reference screens for:
 - Vehicles currently stored in the system
 - Vehicles currently in the facility, loading or unloading
 - Customers currently stored in the system
 - Materials defined for the system
 - Operators authorized to access the system

Operating Features

- User selection of transaction: waste-in, recycle-in, waste-out, recycle-out.
- Customers automatically linked to vehicle number.
- Material hauled tied to vehicle and customer for fast ticket production.
- Enters separate vehicle and trailer / container number for accurate tracking of tare weights.
- Enters new vehicles, customers and materials while in the ticketing screen.
- Allows a vehicle to haul for several different customers or to be fixed to one customer.
- Handles all variations of cash transactions including prompting operator for amount of cash to collect.
- Calculates price based on any of the following units: lbs, tons, cubic yards, load, count, gallons, or user defined units such as barrels, containers, bushels, etc.
- Tracks job totals for hazardous waste or contracts to control maximum of material brought to the facility.

Ticketing

- Processes ticket transactions by entering vehicle number or vehicle licence number
- Produces a detailed vehicle ticket in seconds for inbound or outbound vehicles
- Adds notes to the ticket for special instructions and handling
- Provides for quick reprint of last ticket processed or reprint of selected ticket number
- Provides user selected special tickets including: random inspection, no weigh, manual weights, fixed charge
- Complete ticket editing capability for authorized operators

Reporting

- **Standard reports** - User can select single or multiple standard reports to be printed at one session:
 - Customer information listing
 - Vehicle information listing
 - Material information listing
 - Job information listing
 - Transaction listing by date range
 - Cash transactions by date range
 - Charge transactions by date range
 - Transactions sorted and subtotaled by customer, vehicle, material, and job - by date range (detailed and summary)
 - Random inspection report - by date range
- **Special reports** - Paradox software allows formulation of special reports such as those defined by regulatory agencies.
- **Custom query reports** - Create custom reports based on any information contained in the PDOX system

Invoicing

- Creates ready-to-mail invoices for all types of transactions
- Operator selection of desired time period
- Reprints single invoice or any selected range of invoices
- Creates an invoice register file that can be interfaced with a complete accounting system
- Data transfer - Transaction data transfers by phone lines, floppy disk, or Local Area Network to other computers and software packages such as dBASE, Lotus 1-2-3, Oracle, DIF, or in standard ASCII.

PDOX system options

- **Cash drawer system** - System includes cash drawer, manages all cash transactions, even calculates change.
- **Solomon III accounting system** - Offers the following accounting modules:

General ledger	Accounts receivable
Purchasing	Accounts payable
Payroll	Inventory
Sales order entry	Sales analysis
Fixed asset management	Report generator
- **Streaming tape backup system**
- **Uninterruptible power source (UPS)** - Provides continuous operation power for both the scale and the computer system in case of power failure. Available in several capacities.
- **Ticket printing and vehicle ID entry for unattended operation**
- **Security camera system** - Provides multiple video camera system with VCR to record each transaction on video tape, including time, date, vehicle ID, material ID, and weight.
- **Custom configurations** - The PDOX Waste Management System can be custom configured to meet the user's individual needs and requirements.
